

Field Trial – Kaycee, Wyoming

"We just started Rio about a year ago and got 40 pounds extra on our calves last year plus we're feeding five pounds less hay than we did last year right now and it's been extremely cold." ...Read more below!

- \$36.00/hd of hay savings
- \$36.00/hd*500 hd = \$18,000 hay savings

- 40 lbs/hd*500 hd = 20,000 lbs
- 20,000 lbs * \$1.54/lb = \$30,800

This field trial showed that a ranch of 500 hd which provides hay for 4 months out of the year was able to feed 5 pounds less hay per head in 2017 than in the previous year, and add an additional 40 pounds to their weaning weights.

Taking into account the hay savings and the added pounds of beef production, Riomax impacted his profitability by a total of \$48,800!
